One of the sharpest assaults on the existing system came from Howard Evans of Venturn, Calit, one of the outstanding critics of the old Radio Commission. Indications are that as far as California is concerned Columbia's developments in the 500,000-wathfield will not get beyond the conversational stage. Only station in that state through which the web could promote the super power idea is KNX, Los Angeles, and, with this station disinclined to do any more alliance talking, CBS' shances of achieving wholesale coverage of the Pacific region from a single source are olimmer than slim. KNX, on its own behalf, has been reported seeking a boast into the 500,000 class from its present 64,000.

This would permit KNX to assume on the Coast a position of billing itself as a one-station network.

Chicago, Oct. 8.

It's a matter of only a week or two now till the Hearst enterprises make a move about their radio situation in Chicago with an outright offer to buy WENR from NBC. And it's understood that when the bid is made NBC will accept. At present there is heavy dictering behind the lines to get together on an understanding for a quick and smooth deal.

Allegedly, the net has had a total spense of approximately \$1,500,000 in acquiring this station. The sell-ng price will probably be a reason bit margin above that, between \$1,750,000 to \$2,200,000. WENR

summing up exceptionally well for
a sustaining program, and—if that
line can be drawn—a commercial in
quality if not in reality. Show as

alteration, sweeping music so listenable and clastic enough to handle
jazz and the heavier stuff equally
well. His band classes in effect as

Chi Stations Seek 20% Boost in Rates as Biz Crowds Transmitters

Chiesao, Oct. 1. Station managers locally are be ginning a drive to raise raise in Chicago. There has been sporadic Chicago. There has been sporadic tails regarding possible rate increases in the past few months but under the crush of competition the hugs have failed to set together. But the phones are busings again and it's likely that a meeting will be held either this week or next on a general policy of rate boosting. Stallon managers have been yelping for some time now that Chicago rates are far est of line in comparison with towns of much smaller populations. Towns such as Min-

opulations. Towns such as Min-capolis, St. Louis, Kansas City, paparin, st. Levis, areas expending to the control of the control

thin any of these other midwest towns.

This is the yelp of the local manningers and they see angling now for a 15-20% bep in general rates. Top rate now it \$800 on the NRC station, WERM. Next is the Columbia station, WERM. Next is the Columbia station, WERM as \$450. And in the \$450 stot are WMAQ, KYW and WGN, the Chicago Tribune station. Tribune outlet's \$450 is its rate of a mitional rate and has a head vate considerably lower, the only top station with a local rate in Chicago.

It is figured that the rate should boosted to between \$575-\$600.

Inside Stuff-Music

One N. Y. hotel spot is said to have offered a band a centract for a 30% klokback on future earnings for the next two years. The hotel (or some exec within the ranks with a chiseling yes) proceeds on the theory that the hotel's radio wire is a valuable builder-upper, and that the resultant popularization should yield-big-returns for the future. On this theory some argue that apart from the big name bands who are big, and enjoy a rep for reasons all their own, none of this etherisal for the band as big, and enjoy a rep for reasons all their own, none of this etherisal for the same of the band a bit better known, but it's not resulted in the bands becoming attractions and thus increasing their own incomes. There in quite a bit of satisfical evidence to support this premise. It doesn't apply to Whiteman, Lombardo, Casa Loma, et al. who are draws regardless, but a host of bands in the intermediary hotels, also clubs, restaurants, etc., who, on the air from four to eight times a week, haven't been able to cash in on the ether rep, either through a radio commercial or otherwise.

Jack Mills is publishing four of the tunes that Lucienne Boyer is doing in "Continental Varieties." One of the songs, "Hands Across the Table," got its initial airing in this Broadway meiange. Mills has also obtained the publishing rights to the score for the new Paradise restaurant floor show by Saimuy Stept and Ned Washington, as well as the tunes turned out by Ed Delangs and Joe Myrow for the Delmonico cafe's revue. Will Hudson, composer of "Rioon Glow" and White Heat, has signatured an exclusive contract with Mills Music, Inc.

Right now Robbins Music Corp, although affiliated with Metro and controlled by that company, has a 190% popular catalog. Only picture songs current are the 'Merry Widow' tunes and these are characterized as reprints by Jack Robbins.

Robbins has sailed on a recuperative health and business trip to Holly-wood, via the Canal, in order to get a line on some future Metro
